<sup>(1)</sup> Loans are considered to be in default as of the payment date at which a borrower has missed the preceding two or more consecutive monthly payments

The information concerning the Company's default inventory is compiled from reports received from loan servicers and can be influenced by, among other things, the date on which a servicer generates its report, the number of business days in a month, and transfers of servicing rights between loan servicers. While our total default population was relatively unchanged from July 31, 2020 to August 31, 2020, we may see a significant increase going forward if additional borrowers face challenges related to the COVID-19 outbreak and choose to access the forbearance program for federally backed loans codified under the CARES Act of other programs made available by private lenders.
