**Notes to Financial Statement****1. Summary of Significant Accounting Policies****A. Accounting Practices**

The financial statements of National Mortgage Reinsurance Inc One (“Re One” or the “Company”), are presented on the basis of accounting practices prescribed or permitted by the Wisconsin Office of the Commissioner of Insurance (“Wisconsin OCI”).

The Wisconsin OCI recognizes only statutory accounting practices prescribed or permitted by the State of Wisconsin for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the Wisconsin Insurance Statutes. The National Association of Insurance Commissioners’ (“NAIC”) *Accounting Practices and Procedures* manual, version effective January 1, 2001, (“NAIC SAP”) has been adopted as a component of prescribed or permitted practices by the State of Wisconsin. The state of Wisconsin has adopted certain prescribed accounting practices that differ from those found in NAIC SAP. Specifically, Wisconsin domiciled mortgage insurance companies record changes in the contingency reserve through the income statement as an underwriting deduction. In NAIC SAP, changes in the contingency reserve are recorded directly to unassigned surplus.

The Wisconsin Commissioner of Insurance (the “Commissioner”) has the right to permit other specific practices that deviate from prescribed practices.

A reconciliation of net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Wisconsin is shown below:

**D. Loan-Backed Securities**

(1) The Company uses widely accepted models for prepayment assumptions in valuing loan-backed securities with inputs from major third party data providers. The Company's investment policy complies with SSAP No. 43R - *Loan-backed and Structured Securities* set forth by the Wisconsin OCI.

(2) The Company has not recognized any other-than-temporary impairments for the nine months ended September 30, 2018.

(3) The Company has not recognized any other-than-temporary impairments for the nine months ended September 30, 2018.

(4) All impaired loan-backed securities (fair value is less than cost or amortized cost) for which an other than temporary impairment has not been recognized in earnings as a realized loss:

(a) The aggregate amount of unrealized losses:

1. Less than 12 Months	\$	7,530
2. 12 Months or Longer		—

(b) The aggregate related fair value of securities with unrealized losses:

1. Less than 12 Months	\$	1,572,309
2. 12 Months or Longer		—

(5) Management regularly reviews the value of the Company's investments. If the value of any investment falls below its cost basis, the decline is analyzed to determine whether it is an other-than-temporary decline in value. To make this determination for each security, the Company considers its intent to sell the security and whether it is more likely than not that the Company would be required to sell the security before recovery, as well as the extent and duration of the valuation decline, failure of the issuer to make scheduled interest or principal payments, change in rating below investment grade and adverse conditions specifically related to the security, an industry, or a geographic area.

Based on this analysis, management makes a judgment as to whether the loss is other-than-temporary. If the loss is other-than-temporary, an impairment charge is recorded within net realized capital gains (losses) in the statement of income in the period the determination is made. For the quarter ended September 30, 2018, the Company held no other-than-temporarily impaired securities.

There were no transfers between Level 1 and Level 2 of the fair value hierarchy during the nine months ended September 30, 2018.

The following describes the valuation techniques used by the Company to determine the fair value of financial instruments held as of September 30, 2018.

The Company established a fair value hierarchy by prioritizing the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under this standard are described below:

- Level 1 - Fair value measurements based on quoted prices in active markets that the Company has the ability to access for identical assets or liabilities. Market price data generally is obtained from exchange or dealer markets. The Company does not adjust the quoted price for such instruments.
- Level 2 - Fair value measurements based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals.
- Level 3 - Fair value measurements based on valuation techniques that use significant inputs that are unobservable. Both observable and unobservable inputs may be used to determine the fair values of positions classified in Level 3.

**Notes to Financial Statement**

The circumstances for using these measurements include those in which there is little, if any, market activity for the asset or liability. Therefore, the Company must make certain assumptions, which require significant management judgment or estimation about the inputs a hypothetical market participant would use to value that asset or liability.

The level of market activity used to determine the fair value hierarchy is based on the availability of observable inputs market participants would use to price an asset or a liability, including market value price observations.

(1) Did the reporting entity write accident and health insurance premium that is subject to the Affordable Care Act risk-sharing provisions (YES/NO?)

No, the Company did not write accident and health insurance premium that is subject to the Affordable Care Act risk-sharing provisions.

**25. Changes in Incurred Losses and Loss Adjustment Expenses**

- A. The Company solely acts in the capacity of a mortgage guaranty reinsurer to NMIC. The Company incurred claims and claim adjustment expenses (net of reinsurance) of \$(5,541) and \$44,980 for the nine months ended September 30, 2018 and 2017, respectively. There was a \$60,480 favorable prior year development during the nine months ended September 30, 2018. Reserves remaining as of September 30, 2018 for prior years are \$60,098 following re-estimation of unpaid claims and claim adjustment expenses. The decrease in claims reserves at the end of the period is generally the result of less loan defaults and an increased cure rate in the current year. Original loss reserve estimates are increased or decreased as additional information becomes known regarding individual claims and as claims are settled.

Consistent with NMIC, the Company's practice is to establish claim reserves only for loans in default. A loan is not considered to be in default for claim reserve purposes until NMIC receives notice from the servicer that a borrower has failed to make two consecutive regularly scheduled payments and is at least sixty days in default. The Company also reserves for claims incurred but not yet reported. However, and consistent with the industry, the Company does not establish claim reserves for anticipated future claims on insured loans that are not currently in default. The Company does not adjust premiums on policies currently in-force based on past claim activity.
