NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of National Mortgage Reinsurance Inc One ("Re One" or the "Company"), are presented on the basis of accounting practices prescribed or permitted by the Wisconsin Office of the Commissioner of Insurance ("Wisconsin OCI").

The Wisconsin OCI recognizes only statutory accounting practices prescribed or permitted by the State of Wisconsin for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the Wisconsin Insurance Statutes. The National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures* manual, version effective January 1, 2001, ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of Wisconsin. The state of Wisconsin has adopted certain prescribed accounting practices that differ from those found in NAIC SAP. Specifically, Wisconsin domiciled companies record changes in the contingency reserve through the income statement as an underwriting deduction. In NAIC SAP, changes in the contingency reserve are recorded directly to unassigned surplus.

The Wisconsin Commissioner of Insurance (the "Commissioner") has the right to permit other specific practices that deviate from prescribed practices.

A reconciliation of net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Wisconsin is shown below:

(5) Management regularly reviews the value of the Company's investments. If the value of any investment falls below its cost basis, the decline is analyzed to determine whether it is an other-than-temporary decline in value. To make this determination for each security, the Company considers its intent to sell the security and whether it is more likely than not that the Company would be required to sell the security before recovery, extent and duration of the decline, failure of the issuer to make scheduled interest or principal payments, change in rating below investment grade and adverse conditions specifically related to the security, an industry, or a geographic area.

Based on that analysis, management makes a judgment as to whether the loss is other-than-temporary. If the loss is other-than-temporary, an impairment charge is recorded within net realized investment gains in the statements of operations in the period such determination is made. No other-than-temporary impairments were recognized for the nine months ended September 30, 2023. As of September 30, 2023, the Company held no other-than-temporarily impaired securities.

There were no transfers between Level 1 and Level 2 of the fair value hierarchy during the nine months ended September 30, 2023.

The following describes the valuation techniques used by the Company to determine the fair value of financial instruments held as of September 30, 2023.

The Company established a fair value hierarchy by prioritizing the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under this standard are described below:

- Level 1 Fair value measurements based on quoted prices in active markets that we have the ability to
 access for identical assets or liabilities. Market price data generally is obtained from exchange or
 dealer markets. We do not adjust the quoted price for such instruments; and
- Level 2 Fair value measurements based on inputs other than quoted prices included in Level 1 that
 are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices
 for similar assets and liabilities in active markets, quoted prices for identical or similar assets or
 liabilities in markets that are not active, and inputs other than quoted prices that are observable for the
 asset or liability, such as interest rates and yield curves that are observable at commonly quoted
 intervals; and
- Level 3 Fair value measurements based on valuation techniques that use significant inputs that are
 unobservable. Both observable and unobservable inputs may be used to determine the fair values of
 positions classified in Level 3. The circumstances for using these measurements include those in
 which there is little, if any, market activity for the asset or liability. Therefore, we must make certain
 assumptions, which require significant management judgment or estimation about the inputs a
 hypothetical market participant would use to value that asset or liability.

The level of market activity used to determine the fair value hierarchy is based on the availability of observable inputs market participants would use to price an asset or a liability, including market value price observations.
