Notes to Financial Statements

1. Summary of Significant Accounting Policies

A. Accounting Practices

The financial statements of National Mortgage Reinsurance Inc One (“Re One” or the “Company”), are presented on the basis of accounting practices prescribed or permitted by the Wisconsin Office of the Commissioner of Insurance (“Wisconsin OCI”).

The Wisconsin OCI recognizes only statutory accounting practices prescribed or permitted by the State of Wisconsin for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the Wisconsin Insurance Statutes. The National Association of Insurance Commissioners’ (“NAIC”) *Accounting Practices and Procedures* manual, version effective January 1, 2001, (“NAIC SAP”) has been adopted as a component of prescribed or permitted practices by the State of Wisconsin. The state of Wisconsin has adopted certain prescribed accounting practices that differ from those found in NAIC SAP. Specifically, Wisconsin domiciled companies record changes in the contingency reserve through the income statement as an underwriting deduction. In NAIC SAP, changes in the contingency reserve are recorded directly to unassigned surplus.

The Wisconsin Commissioner of Insurance (the “Commissioner”) has the right to permit other specific practices that deviate from prescribed practices.

A reconciliation of net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Wisconsin is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

For historical reasons, National Mortgage Insurance Corporation (“NMIC”) ceded premiums and claims to Re One on an excess share basis for any primary or pool policy that provides coverage greater than 25% of any insured loan amount. The reinsurance provided by Re One is solely to comply with statutory risk limits that were in effect until January 10, 2019.

During April 2013, NMIC wrote its first mortgage guaranty insurance policy and began ceding premium and risk to the Company under an affiliate reinsurance agreement the following month. Premiums for primary mortgage insurance policies may be paid in a single payment at origination (single premium), on a monthly installment basis (monthly premium) or on an annual installment basis (annual premium), with such election and payment type fixed at policy inception. Premiums written at origination for single premium policies are initially deferred as unearned premium reserve and amortized into earnings over the estimated policy life in accordance with the anticipated expiration of risk. Monthly premiums are recognized as revenue in the month billed and when the coverage is effective. Annual premiums are initially deferred and earned on a straight-line basis over the year of coverage. Premiums written on pool transactions are earned over the period that coverage is provided. Upon cancellation of a policy, all remaining non-refundable

Notes to Financial Statements

deferred and unearned premium is immediately earned, and any refundable premium is returned to the policyholder. Premiums returned to the policyholder are recorded as a reduction of written and unearned premiums in the period paid.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments are stated at amortized cost.
- (2) Bonds are stated at amortized cost using the effective interest method.
- (3) The Company owns no common stock.
- (4) The Company owns no preferred stock.
- (5) The Company owns no mortgage loans.
- (6) Loan-backed securities are valued using the retrospective method and are stated at amortized cost or fair value in accordance with their NAIC designation.
- (7) The Company has no investments in subsidiaries or controlled and affiliated entities.
- (8) The Company has no investments in joint ventures, partnerships or limited liability companies.
- (9) The Company owns no derivative instruments.
- (10) The Company will use anticipated investment income as a factor in the premium deficiency calculation, in accordance with SSAP No. 53, *Property-Casualty Contracts - Premiums*.
- (11) The Company establishes reserves for claims based on our best estimate of ultimate claim costs for defaulted loans using the general principles contained in ASC 944, Financial Services - Insurance (ASC 944). A loan is considered to be in "default" as of the payment date at which a borrower has missed the preceding two or more consecutive monthly payments. The Company establish reserves for loans that have been reported to us in default by servicers, referred to as case reserves, and additional loans that we estimate (based on actuarial review and other factors) to be in default that have not yet been reported to us by servicers, referred to as incurred but not reported (IBNR) reserves. The Company also establishes reserves for claim expenses, which represent the estimated cost of the claim administration process, including legal and other fees, as well as other general expenses of administering the claim settlement process. Claim expense reserves are either allocated (i.e., associated with a specific claim) or unallocated (i.e., not associated with a specific claim).

The establishment of claims and claim expense reserves is subject to inherent uncertainty and requires significant judgment by management. Reserves are established by estimating the number of loans in default that will result in a claim payment, which is referred to as claim frequency, and the amount of claim payment expected to be paid on each such loan in default, which is referred to as claim severity. Claim frequency and severity estimates are established based on historical observed experience regarding certain loan factors, such as age of the default, size of the loan and loan-to-value (LTV) ratios, and are strongly influenced by assumptions about the path of certain economic factors, such as house price appreciation, trends in unemployment and mortgage rates. The Company conducts an annual actuarial review to evaluate, and, if necessary, update these assumptions.

- (12) The Company has not modified its capitalization policy from the prior period.
- (13) The Company does not have any pharmaceutical rebate receivables.

(2) The Company has not recognized any other-than-temporary impairments as of December 31, 2020.

(3) The Company has not recognized any other-than-temporary impairments as of December 31, 2020.

(4) All impaired loan-backed securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

(a) The aggregate amount of unrealized losses:

1. Less than 12 Months	\$	—
2. 12 Months or Longer	\$	—

(b) The aggregate related fair value of securities with unrealized losses:

1. Less than 12 Months	\$	—
2. 12 Months or Longer	\$	—

(5) Management regularly reviews the value of the Company's investments. If the value of any investment falls below its cost basis, the decline is analyzed to determine whether it is an other-than-temporary decline in value. To make this determination for each security, the Company considers its intent to sell the security and whether it is more likely than not that the Company would be required to sell the security before recovery, extent and duration of the decline, failure of the issuer to make scheduled interest or principal payments, change in rating below investment grade and adverse conditions specifically related to the security, an industry, or a geographic area.

Based on that analysis, management makes a judgment as to whether the loss is other-than-temporary. If the loss is other-than-temporary, an impairment charge is recorded within net realized investment gains in the

Notes to Financial Statements

statements of operations in the period such determination is made. No other-than-temporary impairments were recognized for the years ended December 31, 2020 and December 31, 2019. As of December 31, 2020, the Company held no other-than-temporarily impaired securities.

Dividends that exceed ordinary dividends (i.e., "extraordinary" dividends) are subject to the Wisconsin OCI's prior approval. Adjusted net income is calculated as the greater of (a) the net income, excluding capital gains, for the immediately preceding calendar year or (b) the aggregate net income, excluding capital gains, for the 3 immediately preceding calendar years, minus shareholder distributions made in the first two of three aforementioned calendar years. The purpose of this reserve is to protect policyholders against the effects of adverse economic cycles. Sec. 3.09 (14) of the Wisconsin Administrative Code ("Wisconsin Code") allows withdrawals from the reserve in any year to the extent that incurred claims and claim adjustment expenses exceed 35% of earned premiums. Additionally, in order to receive a tax benefit for the deduction of the additions to the statutory contingency reserve, the Company may purchase U.S. government issued tax and loss bonds in the amount equal to the tax benefit. These non-interest-bearing bonds are held in investments for maintaining the statutory liability for ten years or until such time as the contingency reserve is released back into surplus.

The following describes the valuation techniques used by the Company to determine the fair value of financial instruments held as of December 31, 2020.

The Company established a fair value hierarchy by prioritizing the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under this standard are described below:

- Level 1 - Fair value measurements based on quoted prices in active markets that we have the ability to access for identical assets or liabilities. Market price data generally is obtained from exchange or dealer markets. We do not adjust the quoted price for such instruments; and

Notes to Financial Statements

- Level 2 - Fair value measurements based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals; and
- Level 3 - Fair value measurements based on valuation techniques that use significant inputs that are unobservable. Both observable and unobservable inputs may be used to determine the fair values of positions classified in Level 3. The circumstances for using these measurements include those in which there is little, if any, market activity for the asset or liability. Therefore, we must make certain assumptions, which require significant management judgment or estimation about the inputs a hypothetical market participant would use to value that asset or liability.

The level of market activity used to determine the fair value hierarchy is based on the availability of observable inputs market participants would use to price an asset or a liability, including market value price observations.

25. Changes in Incurred Losses and Loss Adjustment Expenses

A. Changes in Incurred Losses and Loss Adjustment Expenses

The Company solely acts in the capacity of a mortgage guaranty reinsurer to NMIC. The Company has reserves for claims and claim adjustment expenses of \$231,592 and \$135,491 for the years ended December 31, 2020 and 2019, respectively. During 2019, the Company had a \$55,221 unfavorable prior year development for the provision for incurred claims and claim adjustment expenses attributable to insured events for prior years. Loss reserves remaining as of December 31, 2020 for defaults occurring in prior years have been reduced to \$48,730, following re-estimation of unpaid claims and claim adjustment expenses. The net increase in the loss reserves as of the end of the period is the result of current year defaults of \$185,239. Original loss reserve estimates will be increased or decreased as additional information becomes known regarding individual claims and as claims are settled.

Consistent with NMIC, the Company's practice is to establish claim reserves only for loans in default. A loan is not considered to be in default for claim reserve purposes until the payment date at which a borrower has missed the preceding two or more consecutive monthly payments. The Company also reserves for claims incurred but not yet reported. However, and consistent with the industry, the Company does not establish claim reserves for anticipated future claims on insured loans that are not currently in default. The Company does not adjust premiums on policies currently in-force based on past claim activity.

The following tables provide claim development data, by accident year, and a reconciliation to the reserve for insurance claims and claim expenses:

SCHEDULE P INTERROGATORIES

1. The following questions relate to yet-to-be-issued Extended Reporting Endorsements (EREs) arising from Death, Disability, or Retirement (DDR) provisions in Medical Professional Liability Claims Made insurance policies, EREs provided for reasons other than DDR are not to be included.
- 1.1 Does the company issue Medical Professional Liability Claims-Made insurance policies that provide tail (also known as an extended reporting endorsement, or "ERE") benefits in the event of Death, Disability, or Retirement (DDR) at a reduced charge or at no additional cost? If the answer to question 1.1 is "no", leave the following questions blank. If the answer to question 1.1 is "yes", please answer the following questions:
- 1.2 What is the total amount of the reserve for that provision (DDR Reserve), as reported, explicitly or not, elsewhere in this statement (in dollars)?
- 1.3 Does the company report any DDR reserve as Unearned Premium Reserve per SSAP #65?
- 1.4 Does the company report any DDR reserve as loss or loss adjustment expense reserve?
- 1.5 If the company reports DDR reserve as Unearned Premium Reserve, does that amount match the figure on the Underwriting and Investment Exhibit, Part 1A - Recapitulation of all Premiums (Page 7) Column 2, Lines 11.1 plus 11.2?
- 1.6 If the company reports DDR reserve as loss or loss adjustment expense reserve, please complete the following table corresponding to where these reserves are reported in Schedule P:

2. The definition of allocated loss adjustment expenses (ALAE) and, therefore, unallocated loss adjustment expenses (ULAE) was changed effective January 1, 1998. This change in definition applies to both paid and unpaid expenses. Are these expenses (now reported as "Defense and Cost Containment" and "Adjusting and Other") reported in compliance with these definitions in this statement?
3. The Adjusting and Other expense payments and reserves should be allocated to the years in which the losses were incurred based on the number of claims reported, closed and outstanding in those years. When allocating Adjusting and Other expense between companies in a group or a pool, the Adjusting and Other expense should be allocated in the same percentage used for the loss amounts and the claim counts. For reinsurers, Adjusting and Other expense assumed should be reported according to the reinsurance contract. For Adjusting and Other expense incurred by reinsurers, or in those situations where suitable claim count information is not available, Adjusting and Other expense should be allocated by a reasonable method determined by the company and described in Interrogatory 7, below. Are they so reported in this Statement?
4. Do any lines in Schedule P include reserves that are reported gross of any discount to present value of future payments, and that are reported net of such discounts on page 10?
 If Yes, proper disclosure must be made in the Notes to Financial Statements, as specified in the Instructions. Also, the discounts must be reported in Schedule P - Part 1, Columns 32 and 33.
 Schedule P must be completed gross of non-tabular discounting. Work papers relating to discount calculations must be available for examination upon request.
 Discounting is allowed only if expressly permitted by the state insurance department to which this Annual Statement is being filed.
